TABLE 1—SAMPLE DESIGN AND RESPONSE RATES

		Stores in:		
	All	NJ	PA	
Wave 1, February 15 - March 4, 1992:				
Number of stores in sample frame: ^a	473	364	109	
Number of refusals:	63	33	30	
Number interviewed:	410	331	79	
Response rate (percentage):	86.7	90.9	72.5	
Wave 2, November 5 - December 31, 1992:				
Number of stores in sample frame:	410	331	79	
Number closed:	6	5	1	
Number under rennovation:	2	2	0	
Number temporarily closed: ^b	2	2	0	
Number of refusals:	1	1	0	
Number interviewed: ^c	399	321	78	

^aStores with working phone numbers only; 29 stores in original sample frame had disconnected phone numbers.

^cIncludes 371 phone interviews and 28 personal interviews of stores that refused an initial request for a phone interview.

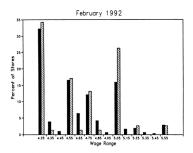

^bIncludes one store closed because of highway construction and one store closed because of a fire.

TABLE 2-MEANS OF KEY VARIABLES

	Stor		
Variable	NJ	PA	t a
1. Distribution of Store Types (percentages	:):		
a. Burger King	41.1	44.3	-0.5
b. KFC	20.5	15.2	1.2
c. Roy Rogers	24.8	21.5	0.0
d. Wendy's	13.6	19.0	- 1.1
e. Company-owned	34.1	35.4	-0.2
2. Means in Wave 1:			
a. FTE employment	20.4	23.3	- 2.0
	(0.51)	(1.35)	
 b. Percentage full-time employees 	32.8	35.0	- 0.1
	(1.3)	(2.7)	
c. Starting wage	4.61	4.63	- 0.4
	(0.02)	(0.04)	
d. Wage = \$4.25 (percentage)	30.5	32.9	-0.4
	(2.5)	(5.3)	
e. Price of full meal	3.35	3.04	4.0
	(0.04)	(0.07)	
f. Hours open (weekday)	14.4	14.5	-0.3
- Describing house	(0.2)	(0.3)	-1.0
g. Recruiting bonus	23.6	29.1 (5.1)	- 1.0
	(2.3)	(3.1)	
3. Means in Wave 2:			
a. FTE employment	21.0	21.2	-0.2
	(0.52)	(0.94)	
 Percentage full-time employees 	35.9	30.4	1.8
	(1.4)	(2.8)	
c. Starting wage	5.08	4.62	10.8
	(0.01)	(0.04)	
d. Wage = \$4.25 (percentage)	0.0	25.3	_
		(4.9)	
e. Wage = \$5.05 (percentage)	85.2	1.3	36.
f. Price of full meal	(2.0)	(1.3)	5.0
i. Frice of full meal	(0.04)	(0.07)	5.0
g. Hours open (weekday)	14.4	14.7	-0.
g. Hours open (weekday)	(0.2)	(0.3)	-0.0
h. Recruiting bonus	20.3	23.4	-0.6
n. Accounting conus	(2.3)	(4.9)	-0.0

Notes: See text for definitions. Standard errors are given in parentheses.

^aTest of equality of means in New Jersey and Pennsylvania.

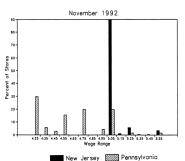

FIGURE 1. DISTRIBUTION OF STARTING WAGE RATES

Formulas

Table 3:

$$\Delta E_i = a + bX_i + cNJ_i + \epsilon_i$$

Table 4:

$$\Delta E_i = a + b'X_i + c'GAP_i + \epsilon_i$$

$$GAP_i = 0$$
 for stores in Pennsylvania

= 0 for stores in New Jersey with

$$W_{1i} \ge $5.05$$

$$= (5.05 - W_{1i}) / W_{1i}$$

for other stores in New Jersey.

 GAP_i is the proportional increase in wages at store i necessary to meet the new minimum rate. Variation in GAP_i reflects both the New Jersey-Pennsylvania contrast and differences within New Jersey based on reported starting wages in wave 1. Indeed, the value of GAP_i is a strong predictor of the actual proportional wage change between waves 1 and 2 ($R^2 = 0.75$), and conditional on GAP_i there is no difference in wage behavior between stores in New Jersey and Pennsylvania.¹⁵

Table 3—Average Employment Per Store Before and After the Rise in New Jersey Minimum Wage

		Stores b	y state	Sto	ores in New Jers	Differences within NJb		
Variable	PA (i)	NJ (ii)	Difference, NJ-PA (iii)	Wage = \$4.25 (iv)	Wage = \$4.26-\$4.99 (v)	Wage ≥ \$5.00 (vi)	Low- high (vii)	Midrange- high (viii)
FTE employment before, all available observations	23.33 (1.35)	20.44 (0.51)	-2.89 (1.44)	19.56 (0.77)	20.08 (0.84)	22.25 (1.14)	-2.69 (1.37)	-2.17 (1.41)
FTE employment after, all available observations	21.17 (0.94)	21.03 (0.52)	-0.14 (1.07)	20.88 (1.01)	20.96 (0.76)	20.21 (1.03)	0.67 (1.44)	0.75 (1.27)
 Change in mean FTE employment 	-2.16 (1.25)	0.59 (0.54)	2.76 (1.36)	1.32 (0.95)	0.87 (0.84)	-2.04 (1.14)	3.36 (1.48)	2.91 (1.41)
 Change in mean FTE employment, balanced sample of stores^c 	-2.28 (1.25)	0.47 (0.48)	2.75 (1.34)	1.21 (0.82)	0.71 (0.69)	-2.16 (1.01)	3.36 (1.30)	2.87 (1.22)
 Change in mean FTE employment, setting FTE at temporarily closed stores to 0^d 	-2.28 (1.25)	0.23 (0.49)	2.51 (1.35)	0.90 (0.87)	0.49 (0.69)	-2.39 (1.02)	3.29 (1.34)	2.88 (1.23)

Notes: Standard errors are shown in parentheses. The sample consists of all stores with available data on employment. FTE (full-time-equivalent) employment counts each part-time worker as half a full-time worker. Employment at six closed stores is set to zero. Employment at four temporarily closed stores is treated as missing.

^aStores in New Jersey were classified by whether starting wage in wave 1 equals \$4.25 per hour (N = 101), is between \$4.26 and \$4.99 per hour (N = 140), or is \$5.00 per hour or higher (N = 73).

^bDifference in employment between low-wage (\$4.25 per hour) and high-wage (≥ \$5.00 per hour) stores; and difference in employment between midrange (\$4.26-\$4.99 per hour) and high-wage stores.

^cSubset of stores with available employment data in wave 1 and wave 2.

^dIn this row only, wave-2 employment at four temporarily closed stores is set to 0. Employment changes are based on the subset of stores with available employment data in wave 1 and wave 2.

TABLE 4—REDUCED-FORM MODELS FOR CHANGE IN EMPLOYMENT

			Model		
Independent variable	(i)	(ii)	(iii)	(iv)	(v)
New Jersey dummy	2.33 (1.19)	2.30 (1.20)	_	_	_
2. Initial wage gap ^a	_	_	15.65 (6.08)	14.92 (6.21)	11.91 (7.39)
 Controls for chain and ownership^b 	no	yes	no	yes	yes
4. Controls for region ^c	no	no	no	no	yes
5. Standard error of regression	8.79	8.78	8.76	8.76	8.75
6. Probability value for controls ^d	_	0.34	_	0.44	0.40

Notes: Standard errors are given in parentheses. The sample consists of 357 stores with available data on employment and starting wages in waves 1 and 2. The dependent variable in all models is change in FTE employment. The mean and standard deviation of the dependent variable are -0.237 and 8.825, respectively. All models include an unrestricted constant (not reported).

^aProportional increase in starting wage necessary to raise starting wage to new minimum rate. For stores in Pennsylvania the wage gap is 0.

^bThree dummy variables for chain type and whether or not the store is companyowned are included.

^cDummy variables for two regions of New Jersey and two regions of eastern Pennsylvania are included.

^dProbability value of joint F test for exclusion of all control variables.

Table 4

	(1)	(2)	(3)	(4)	(5)
New Jersey Dummy	2.277	2.282			
	(1.456)	(1.457)			
Initial Wage Gap			17.052**	16.363*	13.879*
			(6.153)	(6.537)	(7.051)
Num.Obs.	351	351	351	351	351
AIC	2519.9	2524.4	2515.8	2521.1	2524.1
BIC	2531.5	2551.4	2527.4	2548.1	2566.6
RMSE	8.69	8.65	8.64	8.61	8.55
Controls for chain and ownership	no	yes	no	yes	yes
Controls for region	no	no	no	no	yes
